DETAILED ACTION

Specification

The abstract of the disclosure is objected to because of the use of phrases, which can be implied, such as "The present invention provides" on line 1, which should be avoided.

Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Cravatt (U.S. Patent No. 6,161,794).

With respect to Claims 1-14, Figures 1-6, teaches a paper roll dispenser 10 comprising: a tube 12 having an open upper end 32; a lever 34 supported to pivot on the tube and pivotable between a retaining position and a dispensing position; a biasing device 36 being a compression spring; wherein the lower end of the lever has an extension (lower distal end) and an upper extension (upper distal end); the tube has a length equivalent to at least three times a length of one of the rolls of paper; a removable cap 32; the tube is at least partially cylindrical, polygonal; the dispenser defines a rearward and frontward portion.
